DELPHIN Swim Discs type super
Worldwide system for learning to swim 3, 2, 1 – I'm swimming

Children wear 3 discs on each arm - this system allows you to guide your child slowly and patiently to "free unaided swimming." You'll see how quickly your child enjoys learning to swim. Blowing armbands up, finding leaks caused by sharp objects, or your child being afraid as you let more air out of the chambers of conventional armbands are all things of the past. The swimming discs are saltwater-resistant, 100 % waterproof and durable. The DELPHIN swimming discs are easy to care for and store.

5 Star Reviews from Amazon: Delphin Armbands
Durability: *** Fun: ***** Educational: *******

***** **Highly recommended!**, 2 Jun 2010
By **J. Stepney** - These armbands are great, my son is really confident in the water now. Worth the money.

***** **Swimming aids**, 5 Mar 2010
By **Mrs. Ruth L. Taggart** - My granddaughter uses these armbands at swimming lessons; they are so much better than the inflatable kind as they cannot be punctured and are easily 'split' as the child's ability and confidence increases.

***** **The best arm bands ever!!!!!!**, 29 May 2009
By **Rory's Mum "Mel"** (oxon, uk) - If you only buy one thing for your child to go swimming with, get these. The position in the water is so much better than traditional armbands, they are easy to put on, no punctures and lovely bright colours. Everyone at our local pool who has tried them out has ordered them (I should be on commission!). Can't recommend them more highly.

***** **View of a Swimming Teacher**, 30 Aug 2008
By **N. Brown** - I have worked for nearly a decade with these, and I cannot recommend them highly enough. Forget any other belts and bands. Start off with three on each arm, and work your way down. One of the best innovations in swimming over the past 20 years!

***** **Great item!**, 26 Jun 2008
By **K. Mackenzie** (West Yorkshire, UK) - I cannot recommend this item highly enough. My son learned to swim with these as a 3 year old. He is now eight, and I'm now using them with my daughter who is nearly three! They are still in fantastic condition and are far superior to the "blow up" armbands, which pinch skin and deflate. The discs can be removed as swimming improves. They are pricey, but worth every penny!

***** **Delphin Armbands**, 24 Mar 2008
By **M. B. Belleini** (Doncaster, England) - These are fab. We're buying a second set for our second child. They're safe, easy to put on and off, easy to clean. They give confidence because they don't move around on the arm and keep the child afloat - unlike most inflating armbands. No leaks either.
